## **Update to ZP233 Auto Performance Adjustment Process Report**

OIS recently added a new Basic Pay Infotype (0008) option for the [ZP233 Auto Performance Adjustment Process Report](#):

1. For those agencies that issue 4% performance adjustments on 10/1, the report will first look at the contract type of all employees included and then use either the standard “E3-Perf Adj” or the newly-added “E2-Perf Adj on Detail” depending on the Contract Elements Infotype (0016) entry found on the employee’s record.
2. For those agencies that issue performance adjustments for an amount other than 4% and/or make them effective on a date other than 10/1, the report will continue to automatically use the standard “E1-PerfAdj-LO Avoid” for the Basic Pay Infotype entry.
